O. F. Dent, Member

BULLETIN 5307

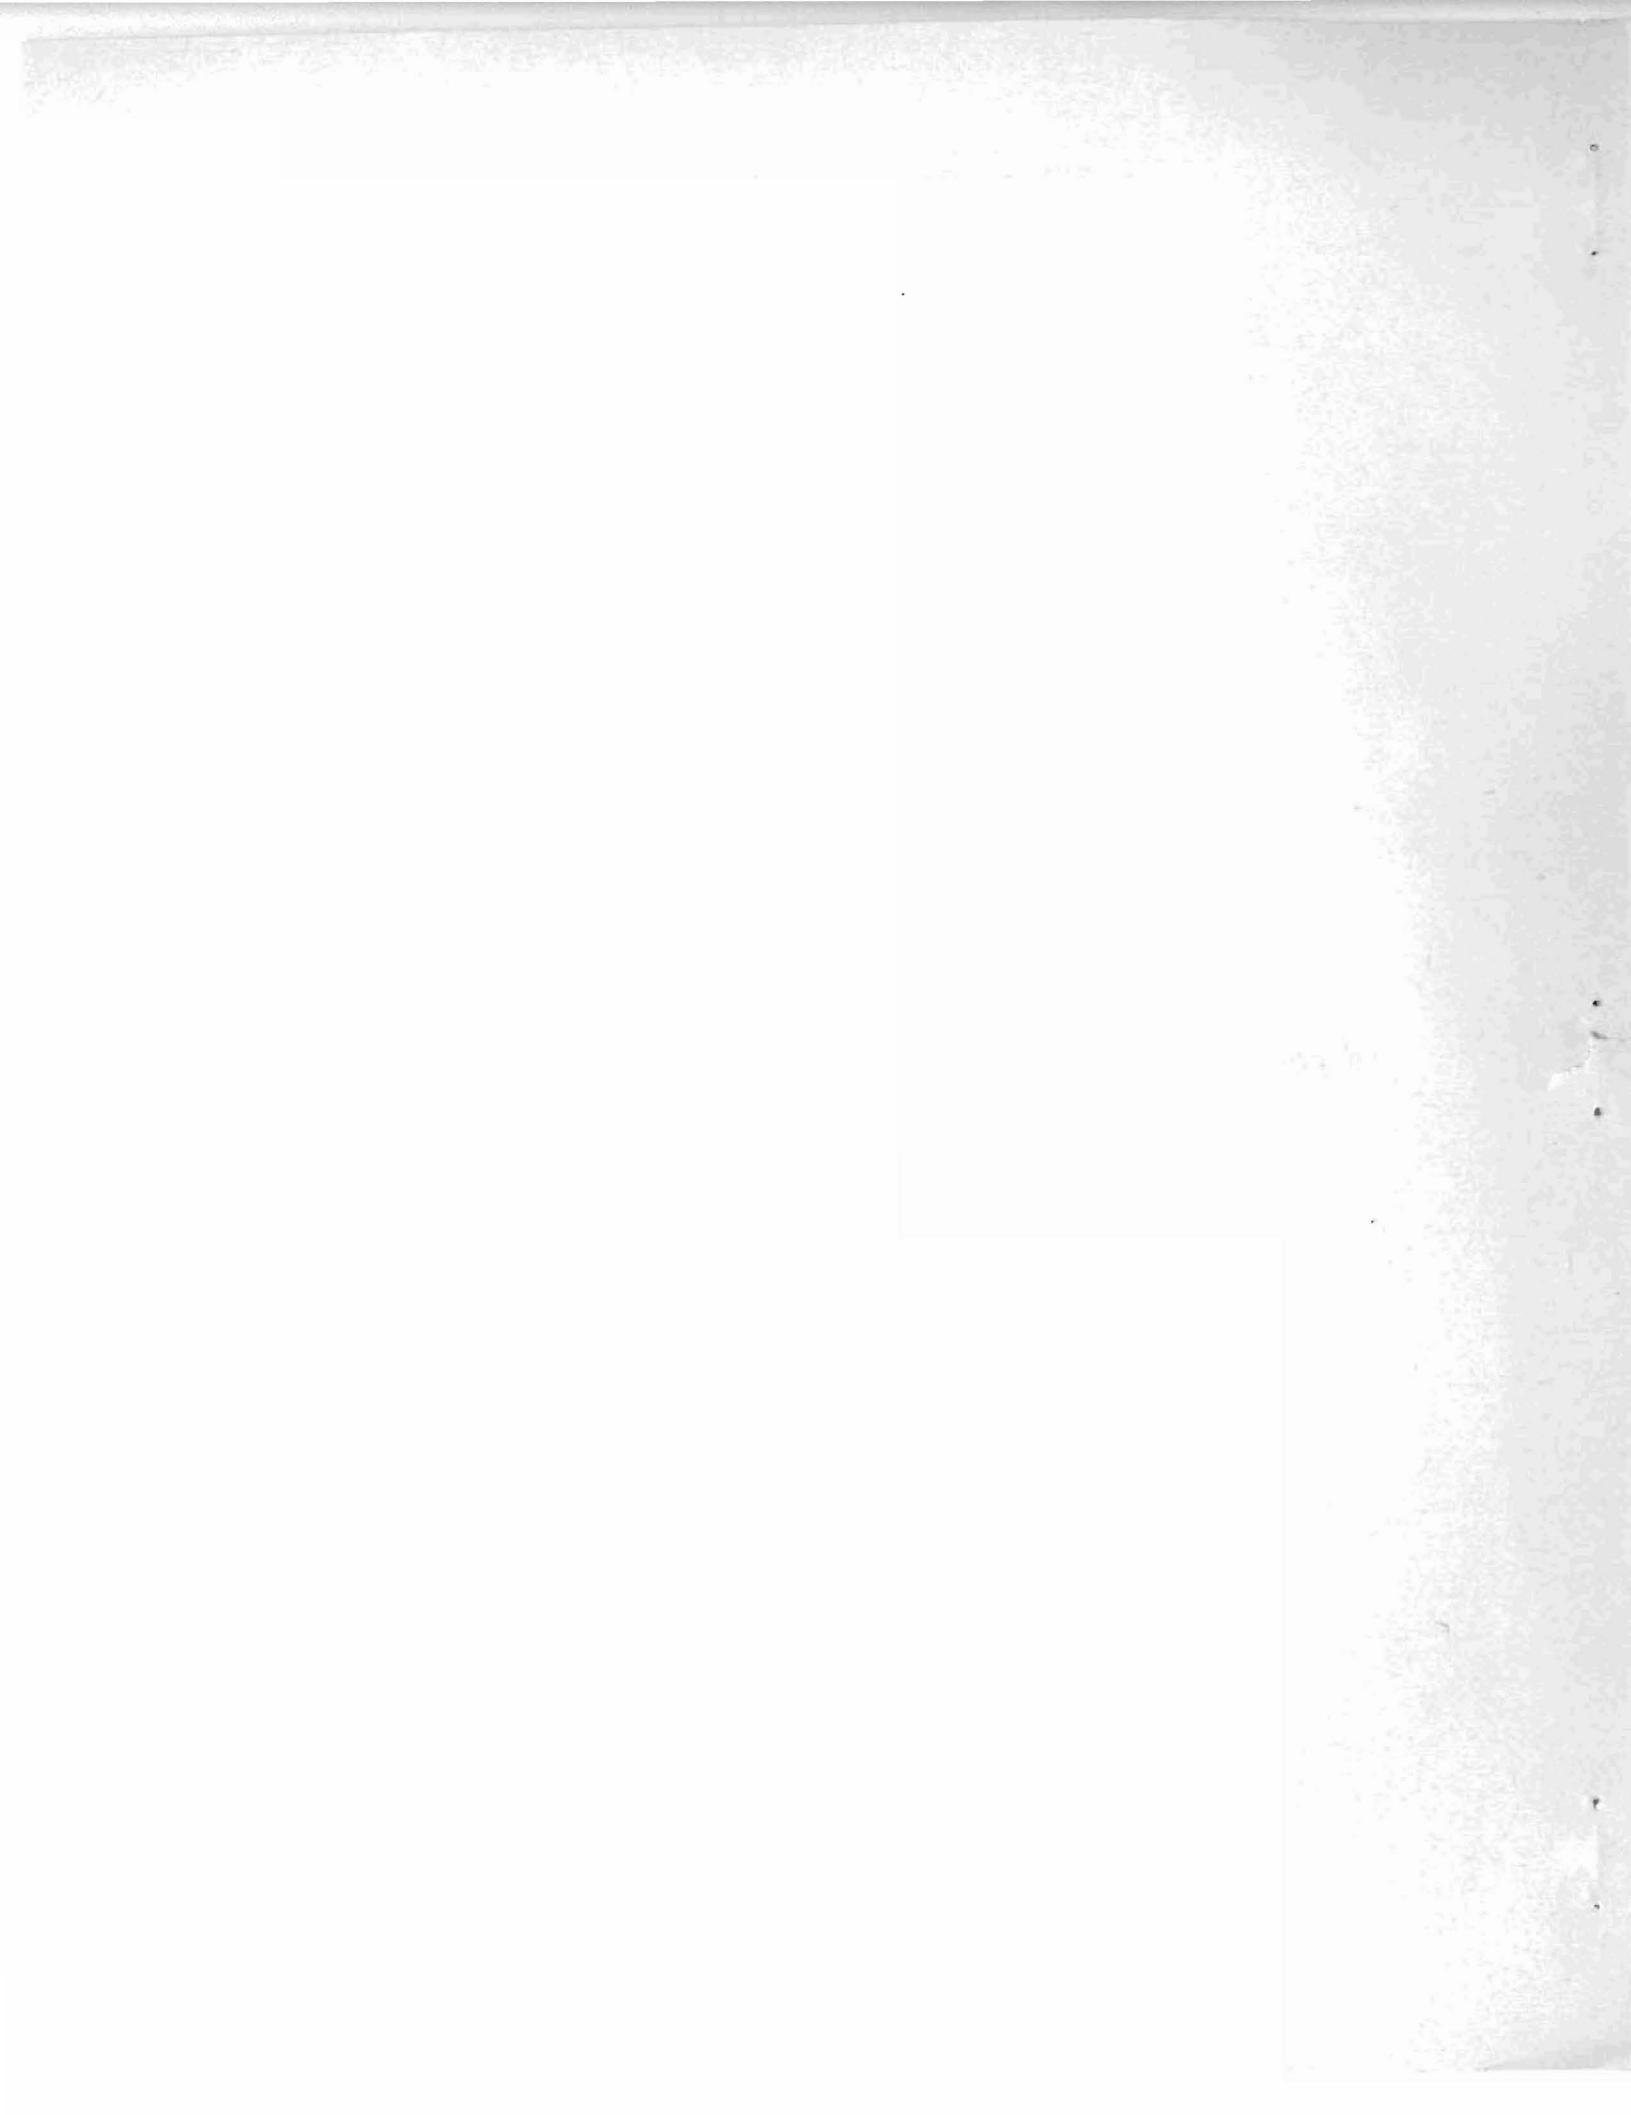

RECORDS OF WATER-LEVEL MEASUREMENTS IN SWISHER COUNTY, TEXAS

1914 - 1953

Compiled by  
C. R. Follett, Engineer  
Texas Board of Water Engineers

Prepared in cooperation with the Geological Survey,  
United States Department of the Interior

December 1953

RECORDS OF WATER-LEVEL MEASUREMENTS IN SWISHER COUNTY, TEXAS

1914 - 1953

Compiled by

C. R. Follett, Engineer  
Texas Board of Water Engineers

December 1953

This bulletin contains measurements of the depths to water below land-surface datum in 93 wells in Swisher County, Texas. A few measurements made in 1914 by C. L. Baker and in 1936 by engineers of the Resettlement Administration are included in this bulletin.

In 1937 an inventory of water wells in Swisher County, including depth-to-water measurements, was made cooperatively by the United States Geological Survey and the Texas Board of Water Engineers. Observation wells were selected and water-level measurements have been made since 1937 as a part of a State-wide cooperative program. In 1945 a new inventory was made to bring the old records up-to-date.

If more than one water-level measurement was made during a month, only the highest water-level is given in this report. The accompanying map shows the location of the observation wells with the well numbers assigned to them in the records. Discussions of the water-level measurements, pumping, rainfall, recharge, geology, and other factors are given in the reports referred to in the following list of publications.
