THE INFLUENCE OF THE CULTURE ON THE PRACTICE OF MEDICAL ETHICS

the culture in which it is practised. The influence of the culture on the practice of medical ethics is a complex one, involving both positive and negative influences.

On the positive side, the culture can provide a framework for ethical decision-making, based on shared values and beliefs. It can also provide a source of support and guidance for healthcare professionals, particularly in difficult situations. The culture can also promote a sense of community and shared responsibility, which can be important in addressing ethical issues.

On the negative side, the culture can also limit the practice of medical ethics. For example, it may lead to a lack of individual autonomy or a lack of respect for patient confidentiality. It may also lead to a lack of accountability or a lack of transparency in decision-making processes.

Conclusion

The influence of the culture on the practice of medical ethics is a complex and multifaceted issue. It is important for healthcare professionals to be aware of the cultural context in which they practise, and to be able to navigate the ethical challenges that arise within that context. By doing so, they can help to ensure that the highest standards of medical ethics are maintained, and that patients receive the best possible care.

It is also important for society as a whole to recognise the importance of medical ethics, and to support the efforts of healthcare professionals to maintain high standards of ethical practice. This can be achieved through education and training, as well as through the development of policies and guidelines that promote ethical decision-making. By doing so, we can help to ensure that medical ethics remains a cornerstone of healthcare, and that patients continue to receive the best possible care.

RECORDS OF WATER-LEVEL MEASUREMENTS IN DIMMIT,

MAVERICK, AND ZAVALA COUNTIES, TEXAS

1920, 1928 through September 1956

Compiled by

C. R. Follett, Engineer

Texas Board of Water Engineers

December, 1956

INTRODUCTION

Periodic measurements of water levels are made in the principal ground-water reservoirs of the state to evaluate effects of ground-water development in relation to available supply. This work is done through an observation well program financed cooperatively by the Texas Board of Water Engineers and the United States Geological Survey.

Records of water levels in some observation wells are published annually in Water-Supply Papers of the Geological Survey. County water-level reports are published periodically by the Texas Board of Water Engineers in cooperation with the Geological Survey. These reports include records of water levels in selected observation wells. This bulletin contains records of measurements of the water levels in feet below land-surface datum in 83 wells in Dimmit County, 5 wells in Maverick County, and 108 wells in Zavala County. The records cover the years 1920 and 1928-56.

In 1929-30 an inventory of water wells in Dimmit, Zavala, and part of Maverick County was made cooperatively by the Geological Survey and the Texas Board of Water Engineers. Further studies were made in 1938-39 and in 1947-48. The data collected were published in 1931, 1940 and 1952. Measurements made during the investigations, as well as interim measurements, are included in this bulletin.

The accompanying maps show the locations of the observation wells. The well numbers on the map correspond to those in the table of measurements.

Graphs showing the fluctuation of water levels in three wells in Dimmit County and four wells in Zavala County, and the annual precipitation at Carrizo Springs, are given on pages 37, 38, 73, and 74. Records of water wells, geologic data, pumpage data, data on irrigated acreage, and discussion of ground water conditions may be found in the publications listed in the bibliography.

* Out of print. Copies are available for reference in some public libraries and at the Austin offices of the Texas Board of Water Engineers and the U. S. Geological Survey.

1. **What is the relationship between the two main characters?**
The two main characters, Mr. and Mrs. Smith, are a married couple. They are shown to have a close and affectionate relationship, with Mr. Smith often referring to Mrs. Smith as "my dear" and vice versa.

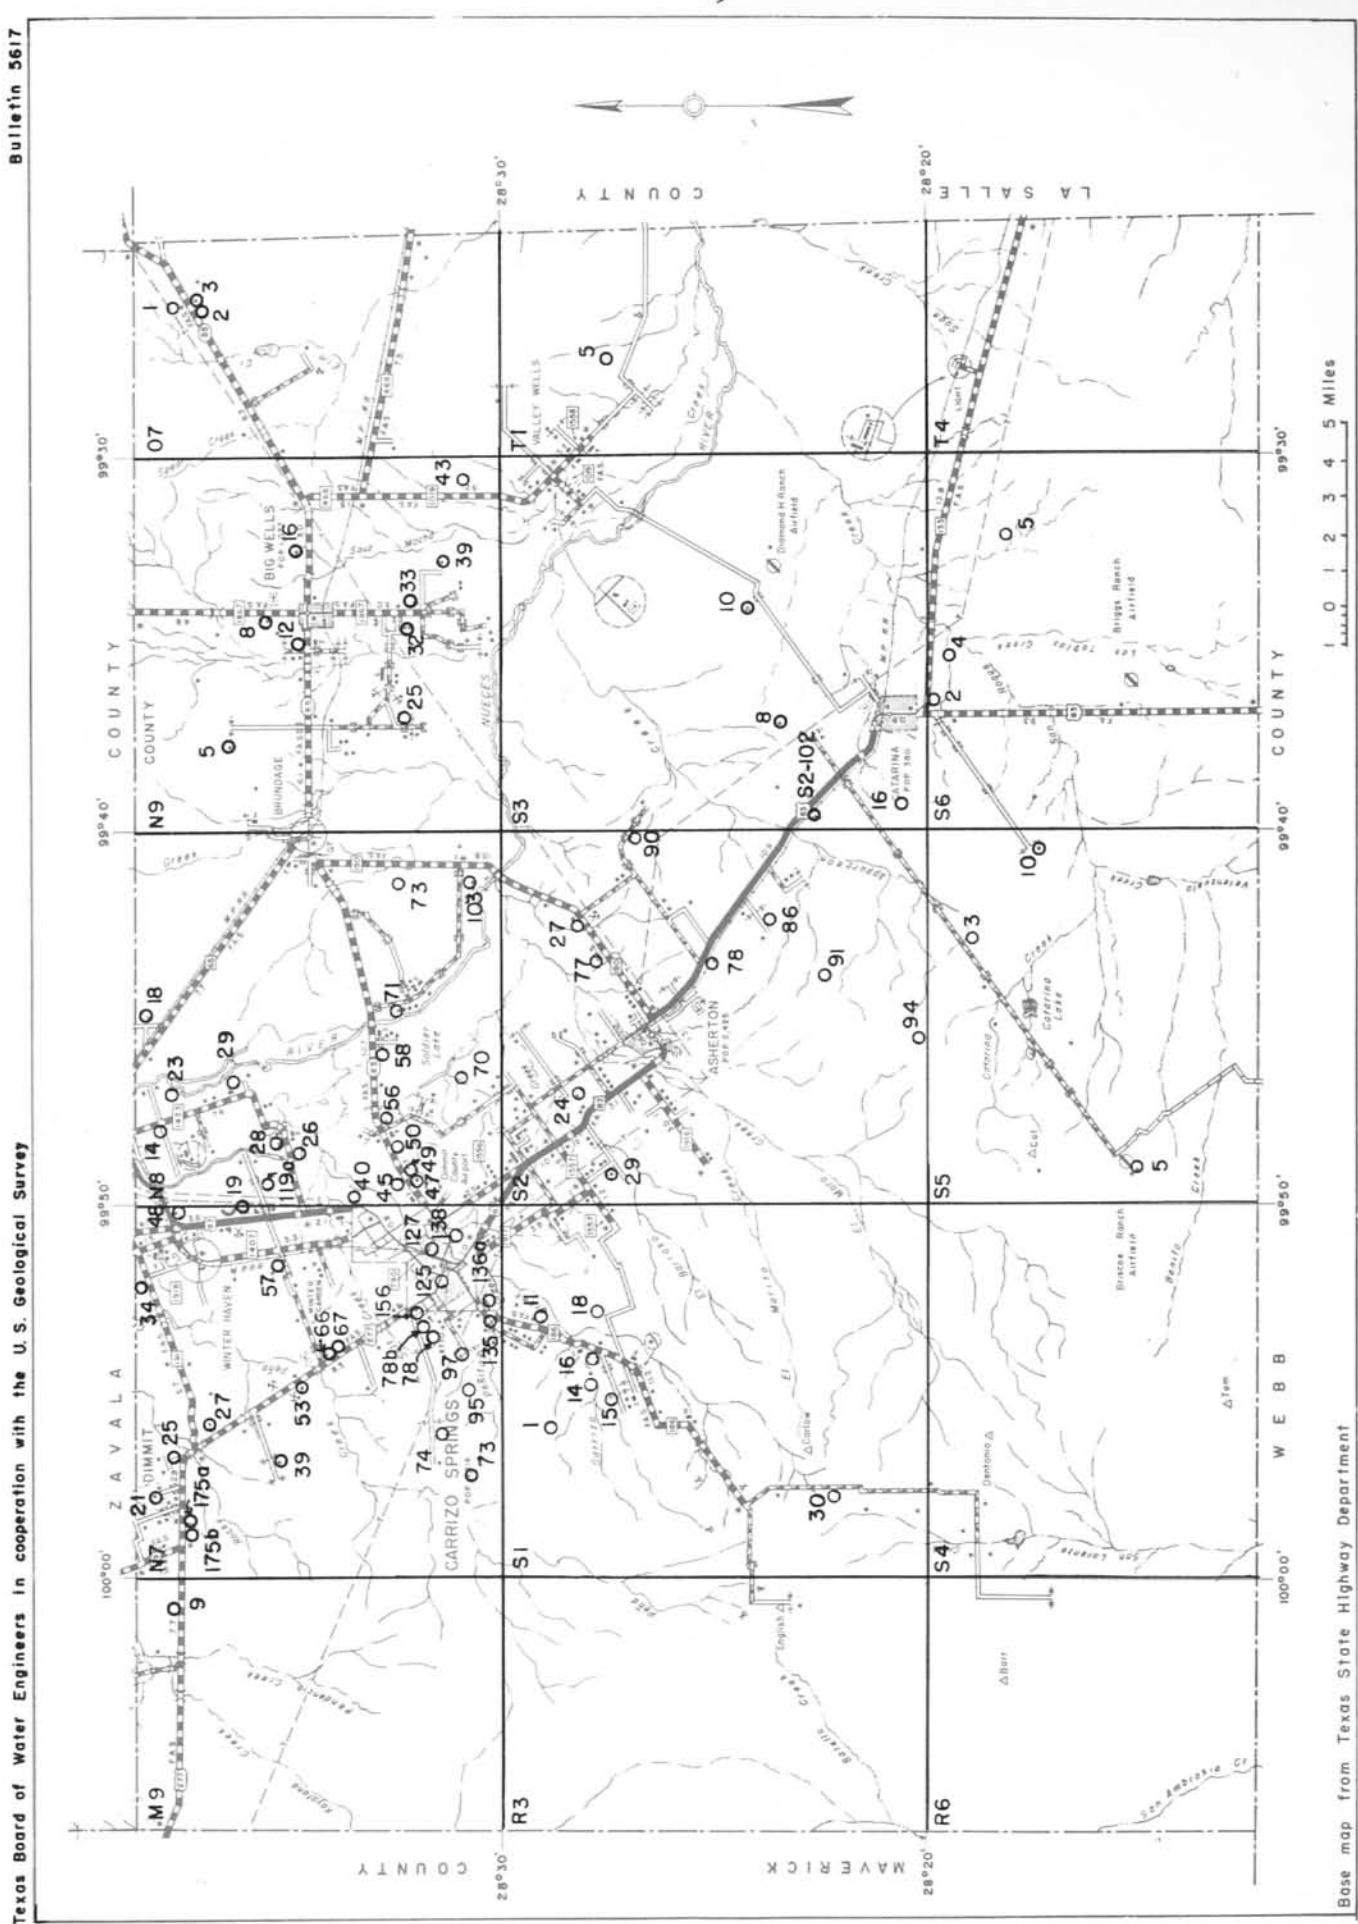

2. **How does the author describe the setting of the story?**
The story is set in a small town in the Midwest, likely during the Great Depression era. The town is described as having a "quiet, almost rural atmosphere" with "old wooden houses" and "wide, paved streets".

3. **What is the central conflict in the story?**
The central conflict is the financial struggle faced by the Smiths. Mr. Smith is a hard-working man who wants to provide for his family, but the economic conditions of the time make it difficult for him to do so. He is constantly worried about how to pay his bills and feed his family.

4. **How does the author develop the character of Mr. Smith?**
Mr. Smith is developed as a strong, determined, and resourceful character. He is shown to be a good provider for his family, always looking for ways to stretch his limited resources. He is also depicted as a kind and considerate husband, who is attentive to his wife's needs and concerns.

5. **What is the overall tone of the story?**
The overall tone of the story is one of quiet drama and social commentary. The author uses a simple, direct writing style to tell the story of the Smiths' struggle, highlighting the challenges they face and the resilience they show in the face of adversity.
