			COMMENTS
April 16, 2009	Looked up their website for any documents or records of the study on Lake Texoma.	Found one on Red River Basin	“Hydrologic Investigation of the Red River Basin” in 1998. The document is for \$10. We do not have this document. We may consider obtaining it.
April 16, 2009	Called Bob Fabian, geologist with OWRB.	Left him a voice message for any studies for the lake	
April 21, 2009	Called Bob Fabian, geologist with OWRB.	Left him a voice message for any studies for the lake	
April 23, 2009	Bob Fabian replied to the phone message. (9:45 AM)	OWRB has not done any studies on Lake Texoma related to Storage and diversion	He also stated that Army Corp of Engineers and North Texas Utilities have done most of these studies.
April 30, 2009	Called and Emailed Julie Cunningham requesting phone discussion.		
May 1, 2009	Julie Cunningham called back and emailed list of Oklahoma permits.	Julie said there were no plans for future development of Oklahoma’s share of Lake Texoma other than the existing permits.	No further contact required

April 21, 2009	Called Greg Estep for studies on Lake Texoma	He said to go through their website and request a documents through Freedom Information Act.	He also said something about a reallocation study on Lake Texoma, which he said is in draft form.
April 21, 2009	Visited Tulsa District Corps Website	Found 3 studies on their website.	<ol style="list-style-type: none"> <li>1. Final Environmental Assessment: Lake Texoma Storage Reallocation Study (2006).</li> <li>2. Environmental Assessment of the sale of the Land at Lake Texoma.</li> <li>3. Lake Texoma Listening Session on Submersible Pumps.</li> </ol>
April 27, 2009	Called Greg Estep for details on new draft storage reallocation study and details of hydropower agreement	He said the current reallocation study builds on the Final 2006 EA report and did not have substantial changes. Since it is still in draft form we would have to use the freedom of information act to obtain. He said we would have to obtain the details of the hydropower agreement between Southwest Power and USACOE from the freedom of information act.	Greg said the freedom of information act may take a few weeks and costs a fee.
April 28, 2009	Called Jan Hotubbee for details on new draft Storage Reallocation study and other Texoma storage issues.	Jan said the new Storage Reallocation study is still in draft form and unavailable to the public. She did not think that there were major changes to the draft Storage Reallocation study included as Appendix F to the May 2006 Final Environmental Assessment. The main focus of the unpublished work dealt with flood control issues and compensation for reallocated hydropower. Jan confirmed that Southwestern Power Administration does not own any water rights in Lake Texoma but has an agreement under the Federal Power Act to generate and market electrical power.	Jan was very helpful and is available for future questions. No further contact required

			COMMENTS
April 23, 2009	Visit with Jerry and discuss Lake Texoma storage and water rights history and future plans. Inquire about other documents. Obtain contacts for more information.	Jerry thought that Southwest Power had right to generate 70 MegaWatts and that their agreement was up sometime around 2018. Jerry said our bar chart numbers looked accurate regarding Texoma water rights and storage allocations. He was unaware of any other documentation that was more current than the 2006 US Army Corps of Engineers Environmental Assessment and 2006 Region C Water Plan. Jerry said to contact Jan Hotubbee of the US Army Corps of Engineers regarding Texoma storage.	Jerry was very helpful. He confirmed much of what we found during the literature review. Jerry gave us several contacts at the USACOE.

April 23, 2009	Visit with Wayne and discuss the five resevoirs of interest in our study. Inquire about other documents. Obtain contacts for more information.	Wayne was unaware of any new studies that we didn't already have. He recommended contacting NTMWD, GTUA, and the US Army Corps of Engineers for more details on Lake Texoma.	Wayne was very helpful. He confirmed much of what we found during the literature review. Wayne offered future assistance if needed.

April 29, 2009	Called and emailed Todd requesting phone discussion.		
April 30, 2009	Call Todd and discuss the five resevoirs of interest in our study. Inquire about other documents.	Of the five reservoirs of interest, Irving has participated only in the pursuit of Marvin Nichols. Irving has not spearheaded any major studies, but has participated with larger entities such as TRWD and UTRWD. Todd said to contact Freese and Nichols for recent studies. The majority of the studies Todd was aware of involved hydraulics and survey data for Marvin Nichols.	No further contact required
